## About the Seminar

For centuries, people were kept in “darkness” because they didn’t know how to read and write. They did not understand why plagues, such as leprosy, cholera, smallpox and scurvy, decimated populations. The functioning of the human body was not understood neither from a scientific nor a medical point of view, and millions of people kept dying as a result of medical illiteracy and ignorance. Broader access to education revolutionized the world and empowered people to control their own destinies.

During the 20th century, heart attacks, cancer and, ironically, medical drugs properly administered became the leading causes of death. Despite extensive conventional medical research, the main causes of cardiovascular disease and metastasis in cancer remained unknown, until now.

This seminar is the result of the development of a new field in natural health and medicine called Dr. Rath’s Cellular Health™ and Cellular Medicine™. These new approaches to health and disease are based on the body’s function at the deepest and the most important level – the cellular level – and are based on solid and credible research.

Matthias Rath, M.D. is the founder of Cellular Health™ and the discoverer of the factual causes of heart attacks and other cardiovascular diseases and metastasis in cancer. His discoveries were supported by the late two-time Nobel Laureate Dr. Linus Pauling. Dr. Pauling publicly stated, “Dr. Rath’s discoveries will be considered among the most important of the 20th century.”

Dr. Rath’s Cellular Health™ revolutionizes medicine, and is called by many physicians “new medicine for the 21st century.”
