

Dr. Rath's Seminar on Cellular Health

Provided by Dr. Rath Education Services

About Us

Dr. Rath Education Services USA, BV is the creator of Dr. Rath's online seminar on Cellular Health™. Our organization is committed to raising awareness and spreading the lifesaving message about Dr. Rath's significant medical breakthroughs that can lead to the eradication of the largest epidemics, such as heart disease, cancer, diabetes and others. Dr. Rath discovered that these epidemics are not diseases, but the results of long-term deficiencies of specific bioenergy nutrients in billions of cells, and they are preventable. We actively promote empowerment through public education in the form of seminars, lectures, literature and Internet Web sites. Dr. Rath's discoveries and worldwide health education campaign has had a significant impact on the lives of thousands of people in North and South America, Europe, Africa, Australia and Asia.

Scientists at the Dr. Rath Research Institute conduct cutting-edge research in natural health based on Dr. Rath's scientific discoveries and the understanding of the critical role of essential nutrients in restoring and maintaining health at the deepest and most important level in the human body – the cellular level. This level has been totally neglected by the pharmaceutical industry. Our research findings have been presented at dozens of scientific conferences around the world and published in numerous respected, peer-reviewed biomedical journals and Web sites.

Our uniqueness is derived from Dr. Rath's discoveries in the root causes of some of today's most detrimental diseases and our extensive and credible research. The factual causes of heart disease, high blood pressure, diabetes and metastasis in cancer had been unknown for decades. Dr. Rath's unique discoveries have been applied to the development of patented Cellular Health™ Programs that are based on specific nutrient synergy, the principles of Dr. Rath's Cellular Medicine™, and gold standard clinical research.

Dr. Rath is the first medical doctor ever to bravely confront the largest industry in the world - the pharmaceutical "business with disease"- and to fight for vitamin freedom. Since 1996, Dr. Rath has been leading the charge in preventing the unethical plans of the United Nations' Codex Commission to ban health rights in relation to vitamins and restrict access to natural therapies on a global scale. Dr. Rath's dedicated advocacy also spurred events that led to the passage of the Dietary Supplement Health and Education Act (DSHEA) of 1994 in this country.

In recognition of his extraordinary efforts to advance nutrition science, educate the public on the health benefits of nutrients, and end government censorship of health information, Dr. Rath received the 2001 Bulwark of Liberty Award.

Dr. Rath's Web site, www.drrathresearch.org, is one of the most frequently visited sites and the world's leading online source of information about Dr. Rath's innovative Cellular Health™ and Cellular Medicine™ approaches and other natural health science.

The long-term goal of our organization is to make health a human right by the year 2020 and to continue advocating worldwide access to effective, safe, and affordable healthcare that is patient-oriented, not business-oriented. We invite you to join us in contributing to a healthier world and a better tomorrow for all citizens of Planet Earth.
